ELIAP News

For Members & Associates

VOLUME : XXII

ISSUE : April 2005

Dear Members,

I am glad to inform you that the Executive Committee is meeting every month regularly for the past six months and actively interacting with various Government Agencies keeping the interest of the members of the Association. The Association is thankful to the A.P. Government and especially the IT&C Department for incorporating our suggestions in the new ICT Policy 2005-2010 being released shortly. The new policy gives equal importance to the hardware sector and extends more or less all facilities available to IT & ITES Sectors (see inside for salient features)

The Union Government's budget announcement reducing the peak rate of Custom Duty to 15% from previous 20% and also extending NIL duty to 217 tariff lines related to IT products as per WTO-IT Agreement throws a challenge to the domestic manufacturing industry to readjust for more exports and move to SEZ as soon as possible. The protection for domestic sales is by way of retaining 16% CVD (except software) and imposition of special Additional Duty at 4% on the above products which is CENVATABLE. To some extent this additional duty may offset the State VAT introduced by 21 States w.e.f. 1st April 2005 (see inside for highlights) Other major change announced relates to introduction of 8 digit HSN code in Excise classification to align with Customs classification.

Manufacturing Industry has welcomed the introduction of VAT and pledged its support for successful implementation. Many of our members have attended various seminars and well understood the subject. The State Government has promised to make amendments like bringing in the HSN code first followed by the item description and also for taking up of some more electronic items under 4% category with the empowered Committee in due course. We shall pursue the matter through appropriate channels both at the State and Central levels. We hope that the States will impose Entry Tax at the earliest on imported goods equivalent to local Sales Tax for providing a level playing field to the domestic industry.

While the Association is promising A.P. State Government to bring in more hardware manufacturing industries, it is disheartening to note that the share of A.P. in hardware Export is at a dismissal Rs.45 crores (0.58%) against Country's exports of Rs.7700 crores during the year 2003-2004 as per the statistical year book 2004 released recently by Electronics and Computer Software Export Promotion Council (ESC) (see inside). Except one company (M/s.OSI Systems Pvt.Ltd.) none of the hardware manufacturing companies in A.P. are figuring in the list of top 10 exporters of the country in any sector.

To encourage members to participate actively in the activities of the Association. I propose to invite 15 to 20 members to the Executive Committee meetings by rotation. I appeal to all members once again to take active interest and strengthen the activities of the Association.

You might have noticed the improvement in the quality of the paper used in this second issue and also allotment of two pages (Second & backside cover) to the sponsorer. Members may utilize this facility effectively.

I wish all members and their families a very happy Ugadi and prosperous Telugu New Year.
